

CLASS:V

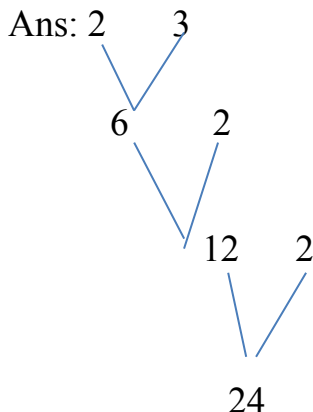

BE MY MULTIPLE,I'LL BE YOUR FACTOR

IMPORTANT POINTS

1. MULTIPLE: Multiple means to write the table of that number.  
Example:Multiples of 3 are 3,6,9,12,15,18,21.....
2. FACTOR: A number which can divide given number exactly is called the factor of that given number.  
Example: Factors of 12 are 1,2,3,4,6,12.
3. Write any multiples of 5:  
Ans: 5,10,15,20,25,30,35,40,45,50
4. Write the smallest common multiples of 3 and 5:  
Ans:  
Multiple of 3 is 3,6,9,12,15,18,21,24....  
Multiple of 5 is 5,10,15,20,25,30,35.....  
The smallest common multiple of both 3 and 5 is 15.
5. Write the factors of 10:  
Ans:1,2,5,10.  
We can find it from chart also

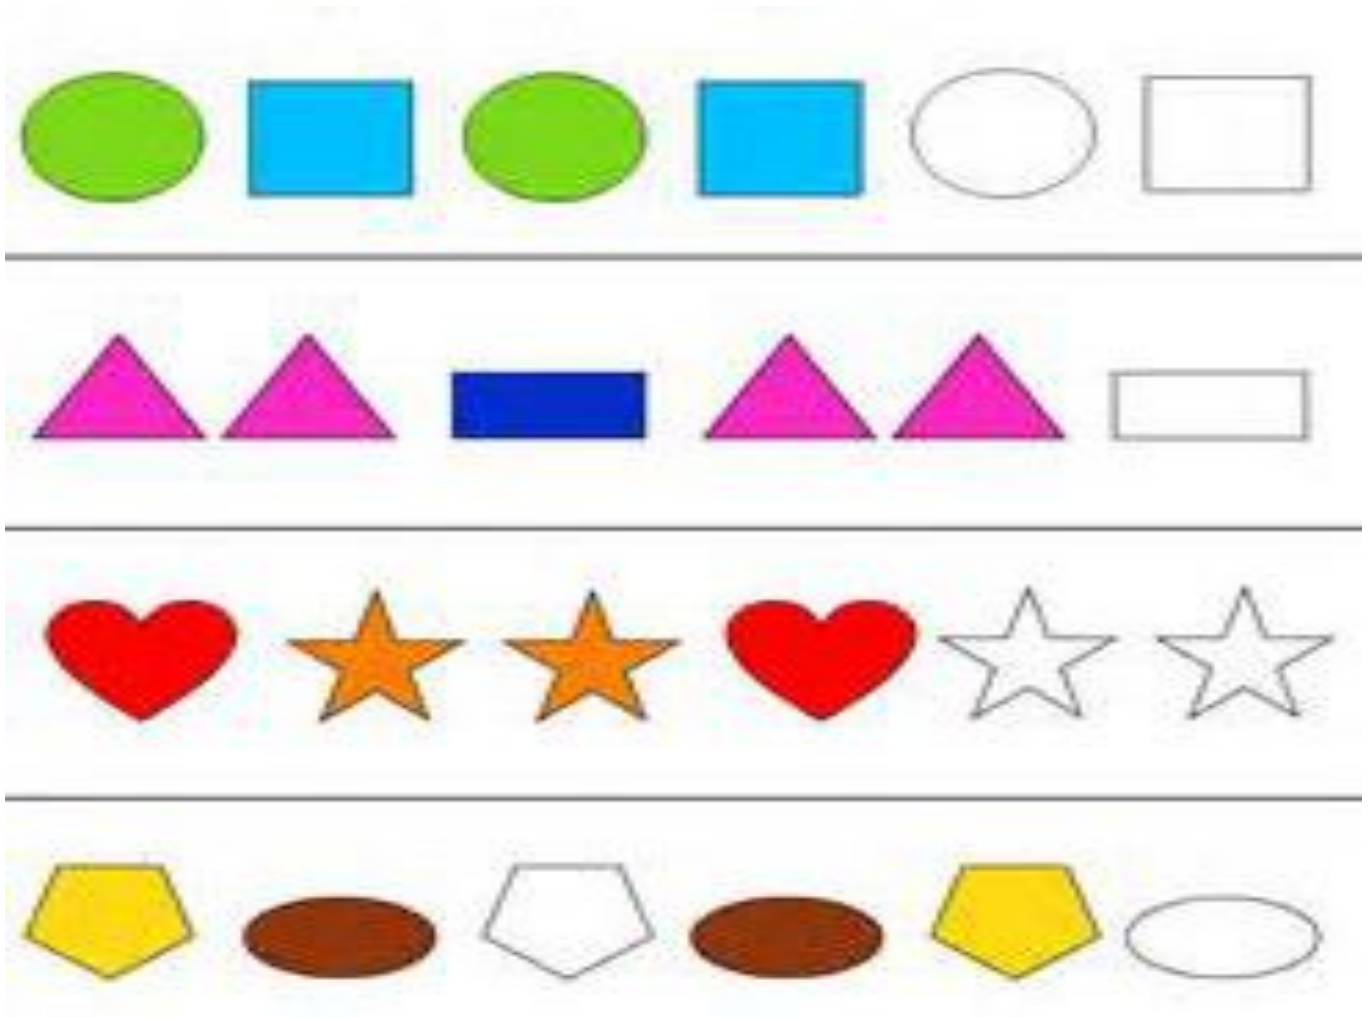

10
5 x 2
1 x 10

6. Write the common factors of 25 and 35:  
Ans: Factors of 25 are 1,5,25  
Factors of 35 are 1,5,7,35  
The common factors of both 25 and 35 is 1,5
7. Draw the Factor tree for the 18:

CAN YOU SEE THE PATTERN

What should come next?

Using the same rule take it forward till you get back to what you started with.

--	--	--	--	--	--	--	--	--	--

FILL IN THE BLANK SPACES IN THE SAME WAY.

1.  $14 + \underline{\quad} + \underline{\quad} = 34 + 14 + 20$

2.  $200 + 300 + \underline{\quad} = \underline{\quad} + 400 + 200$

## NUMBER SURPRISE

1. Take a number = 4

Double it =  $4 \times 2 = 8$

Multiply by 5 =  $8 \times 5 = 40$

Divide your answer by 10 =  $40 / 10 = 4$
