

## Lesson 1 – What is long? What is round?

The sides of 2-D and 3-D shapes are a straight line that form a plane.

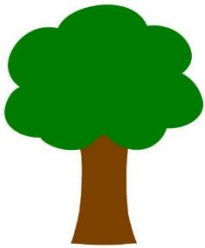

The sides are also known as edges.

The meeting point of sides are called corner.

| Shapes  | Shapes Name | No. of sides | No. of corners |
|---|-------------|--------------|----------------|
|    | Square      | 4            | 4              |
|    | Rectangle   | 4            | 4              |
|   | Circle      | no           | no             |
|  | Triangle    | 3            | 3              |
|  | Oval        | no           | no             |

Tick ✓ the objects that are round.

Draw the things that are roll:

Clock

ball

pencil

chalk

Bangle

water melon

tomato

carom coin

Tick ✓ the objects that are long.

**Draw the things that are slide:**

Note-book

pencil box

scale

exam pad

Cricket bat

comb

gift box

eraser

**Draw the things which can both roll and slide:**

Clock

bangle

tyre

Bottle cap

coin
